

How do I use deep links in Blackboard?

Deep links allow you to direct students or staff members to a particular content area or item in your Blackboard course (provided they are enrolled on the course). On clicking the link, if the person is logged into Blackboard, they will be taken straight to the highlighted item. If they have not logged in to Blackboard, they will be asked to log in but will then be redirected to the area or item linked.

This function could be particularly useful for outlining to students where to find materials for their assignments or lecture notes.

Select and copy the full URL of the web page

Subject

Message
For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

Hello Student
